At first to-day the market opened at quotations that were in nearly all cases considerably above those that were finally made yesterday. Then a hesitating tone developed, owing to profit-taking sales, and prices declined. Again prices rose, only to fall again, and again rallied, leaving of irregularly.

The volume of dealings in stocks was about the same as yesterday, but the buying of bonds proportionately increased, the bond market again showing that same diversified attention of investors that was Its especial feature last week.
